

WE HEARD YOU...

Meet TruckR

The app designed and tested by truck drivers, for truck drivers.

TruckR has all the vital information you need to travel on the Alternate Route while work continues to open State Highway 1, Kaikoura coast.

Highlights stopping areas suitable for 20-metre trucks, passing lanes, trailer swap areas, one lane bridges, and places with limited cellular coverage along the route, along with petrol stations, food outlets and public toilets.

Connects to the Transport Agency traffic and travel alert system, giving users real time information about road works, crashes and road closures.

TruckR users can open the app and plan their journey before they start, or pull over and check information on the way, as the map features can operate without mobile phone coverage.

Get TruckR

TruckR has been funded by the NZ Transport Agency, in partnership with the Road Transport Association NZ
