

### **General (for both options)**

The yard will contain heavy construction equipment such as cranes, trailers, welding plants, as well as structural steel assemblies for the pier brackets. This equipment is dangerous to the public who will be kept well away at all times.

Safe but controlled access adjacent to the construction yard for boaties to access their boats will be possible under the following arrangements:

1. It is unlikely that the existing boat launch structure will be available for use.
2. Crane lifting activities will be under way at various times.

Released under the Official Information Act 1982
