SH1 Rangiriri local detours on sealing days

Ramps on both Rangiriri and Te Kauwhata interchanges will be closed on the 2-3 days of chip-sealing in each direction

Sealing will take 2-3 days in each direction so northbound sealing closes northbound ramps; southbound sealing closes southbound ramps.

Northbound traffic wishing to leave SH1 will need to go to Hampton Downs Interchange and return.

Southbound traffic cannot use the ramps during southbound sealing days and will need to go to Ohinewai Interchange and return.

Similar detours will be required for local traffic wishing to go north during the northbound sealing: Access is via southbound ramps to Ohinewai and return. When southbound ramps are closed local traffic should go north to Hampton Downs and return.

Local roads are not part of the official detours.
