

# End to end transport planning and investment system

## Strategic and planning drivers

GPS on land transport

Strategies and spatial plans  
(e.g. Road to Zero, Arataki)

Regional and Local planning documents  
(e.g. LTP, AMP, RPTP, ATAP, LGWM)

Other strategic inputs  
(e.g. Mode shift plan, Sustainability plan, Māori strategy, ONRC)

Develop RLTPs

Activities and programmes put forward for inclusion in NLTP

## Investment decision-making framework

Investment prioritisation for inclusion in NLTP  
(includes GPS alignment)

### Build the business case:

- Determine business case pathway where required
- Alternatives and options generated and assessed
- Completed business case submitted

### Investment decision:

- Assess the business case for quality and for investment
- Confirm prioritisation, including GPS
- Approve or decline

Pre-implementation (detailed design) and implementation

Benefits realisation: Monitor, evaluate and report

Feedback loop
