## 5 Assessment of Environmental Effects

*An assessment of environmental effects [AEE] in accordance with schedule 4 of the Resource Management Act 1991 must be provided with the application. The AEE detail must correspond to the scale of the effects that the activity may have on the environment.*

*Completing the AEE section of this form will be sufficient for most applications. However for activities with actual or potential effects that are significant, a separate comprehensive AEE report including specific investigations may be required.*

*Schedule 4 can be viewed at [www.trc.govt.nz/resource-consent-application-forms](http://www.trc.govt.nz/resource-consent-application-forms)*

5.1 If the application is to renew a consent, summarise the monitoring that has been undertaken and the environmental effects as identified by that monitoring.

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

OR

New Consent/No monitoring data

5.2 Will the dam be across a permanently flowing stream? Yes  No

If the answer is no, comment on duration of dry period [eg. % of time, months per year]

---

---

---

---

---

---

---

---

---

---

5.3 Comment on the effect the dam will have on flow downstream during dry periods. If provision has been made to allow some flow past the dam, please give details.

Weir will enable spill of residual stream flow.

---

---

---

---

---

---

---

---

---

---

5.4 What provision is made for fish passage past the dam? Indicate species that will be provided for, and attach drawing of fish pass if appropriate. If no provision for fish passage is proposed explain why not.

Fish passage at weir structure will be provided.

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

---

5.5 What provision has been made to cope with flood flows? If there is no spillway explain how floodwaters will pass safely.

Low weir structure will simply overtop in high flow events.

---

---

---

---

---

---

---

---

---

---

5.6 Comment on the potential for damage in the event of dam failure (eg. effects on downstream bridges, roads, property).

The weir is very limited in size (less than 1m high) and will have a limited reservoir. There is no potential for damage in the event of failure.

---

---

---

---

---

---

---

---

5.7 Comment on the effects of the reservoir (eg. potential flooding or other effects to neighbours).

The limited size of the reservoir means that potential flooding or other effects are considered to be negligible.

---

---

---

---

---

---

5.8 Please note any other information that may assist the Council in processing your application.

See AEE for other background information.

**Note:** For new dams where the dam height is at least 4 metres and the storage volume is at least 20,000 m<sup>3</sup>, a Building Consent is required. Building consents for dams are administered by Waikato Regional Council. Further information is available from the Council website [www.trc.govt.nz](http://www.trc.govt.nz) [follow the links from the 'Resource Consents' Tab]

6.2 Will a building consent be required for your Dam?

No

Yes  Dam height is at least 4 metres and storage volume is at least 20,000 m<sup>3</sup>

## 7 Assessment of Part 2 Matters and Policy

*An assessment of the activity against the matters set out in Part 2 of the RMA and against any relevant provisions of policy documents and regulations must be provided with the application. The assessment must be in sufficient detail to satisfy the purpose for which its required.*

*For most applications the brief assessment provided below will be adequate. However for activities with significant policy implications, or where a National Policy Statement is relevant, a specific more comprehensive assessment is likely to be required.*

The proposal is consistent with Part 2 of the RMA (the focus of which is to promote sustainable management of natural resources). The *Regional Fresh Water Plan for Taranaki* generally supports damming of water if the effects during construction and ongoing adverse effects such as those associated with restricted fish passage, reduced flow downstream and flooding are avoided, remedied or mitigated. These requirements can be met by including reasonable conditions on any consent granted.

## 8 Consultation / Affected Parties

8.1 Please list the persons that you believe to have an interest in or that may be affected by the proposal.

Name Address

See AEE for engagement and consultation details.

---

---

---

---

---

---

---

8.2 Detail the consultation undertaken with any interested/affected parties, and the views of those consulted. Attach correspondence if appropriate. The consultation undertaken and the information provided is to aid the Council in determining who may be adversely affected by the proposal.

See AEE for engagement and consultation details.

---

---

---

---

---

---

---

*Please note: Council may determine that your application is to be notified. But generally it will be non-notified if there are no more than minor adverse effects beyond the adjacent land, and if written approval is obtained from all those people who are likely to be adversely affected in a minor or more than minor way. Council will determine the people who are likely to be adversely affected and you will have the option of obtaining their written approval so that your application can be non-notified.*

## 9 Draft report and conditions

Yes  No

*If you answered 'Yes' please consider agreeing to a timeframe extension [See section 10 below.]*
