

If it was easy and safe to do so, would you change the way you travel?

(Choose all that apply)

- I would be more likely to take short trips on a bike or walking
- I would use my car less for travel
- I would be more likely to catch the bus
- I would encourage my children to walk or bike to school
- I would not change my travel choices
- I don't know
- Other (please specify)

Do you support building safer infrastructure to support other travel options, such as walking or cycling?

(Choose any one option)

- Yes, I would like to see more people choosing alternative ways of travel
- No, I don't want more investment in this space
- Unsure

Do you support increasing the number of safe crossing points

(Choose any one option)

- Yes, there needs to be more
- No, there are already enough
- Unsure

### PROPOSED IMPROVEMENTS

The proposed improvements include the upgrade of several key intersections on the corridor. Many of these upgrades involve installing traffic lights.

Traffic lights make intersections more efficient for vehicles, and allow for the safe crossing of pedestrians, mobility scooters and cyclists through signalised crossing points.

We're proposing the following improvements at key intersections. Do you agree?

	Definitely agree	Somewhat agree	Neither agree nor disagree	Somewhat disagree	Definitely disagree
Basley Road - install traffic lights with better bus stop facilities at the Richmond Superette					
Brent Road - make the intersection left-in and left-out only with safe pedestrian crossings					
Owhata Road - replace the roundabout with traffic lights					
Wharenui Road - install traffic lights to support development					
Lee/Gee Road - realign Gee Road to make one intersection with Lee Road and install traffic lights					
Eastgate/Rotorua Airport - build a roundabout and a new access road to the airport and Eastgate Business Park
