

INTERSECTION IMPROVEMENTS AT PORTLAND ROAD AND LOOP ROAD (SOUTH)

- The project will also deliver a safer intersection and improved turning facilities at Portland Road, upgrading it to a high standard similar to other State Highway 1 intersections north of Auckland
- The improved intersection will include widening to support safe right turns into Portland Road and a realigned intersection to improve driver sight visibility for Portland Road traffic accessing the state highway
- A partial or complete closure of the intersection of Loop Road (South) and SH1 is being considered to improve safety on SH1 by removing conflicting turning movements and to remove heavy vehicles from the southern end of Loop Road
- A full closure of the Loop Road (South) intersection would result in less freight traffic travelling past Otaika Valley School and residential properties on Loop Road.

Feedback sought on the Loop Road (South) intersection
