Brigham Creek to Waimauku Safety improvements

Creating safer roads and roadsides

The Safe Roads and Roadsides programme is one of four components of the Safe System approach, the government's response to the high number of deaths and serious injuries on New Zealand's roads.

 SAFE ROADS

ROAD USE
 SAFE
VEHICLES

Pavement widening and key intersection treatments

The Safe System approach acknowledges that people make mistakes and aims to create a transport system that protects people from death and serious injury.

Warning signs and

road markings

Median barriers to help prevent head-on crashes Clear roadside areas where there are no obstacles

Roadside barriers to redirect out-ofcontrol vehicles away from potential roadside hazards
