

State Highway 23

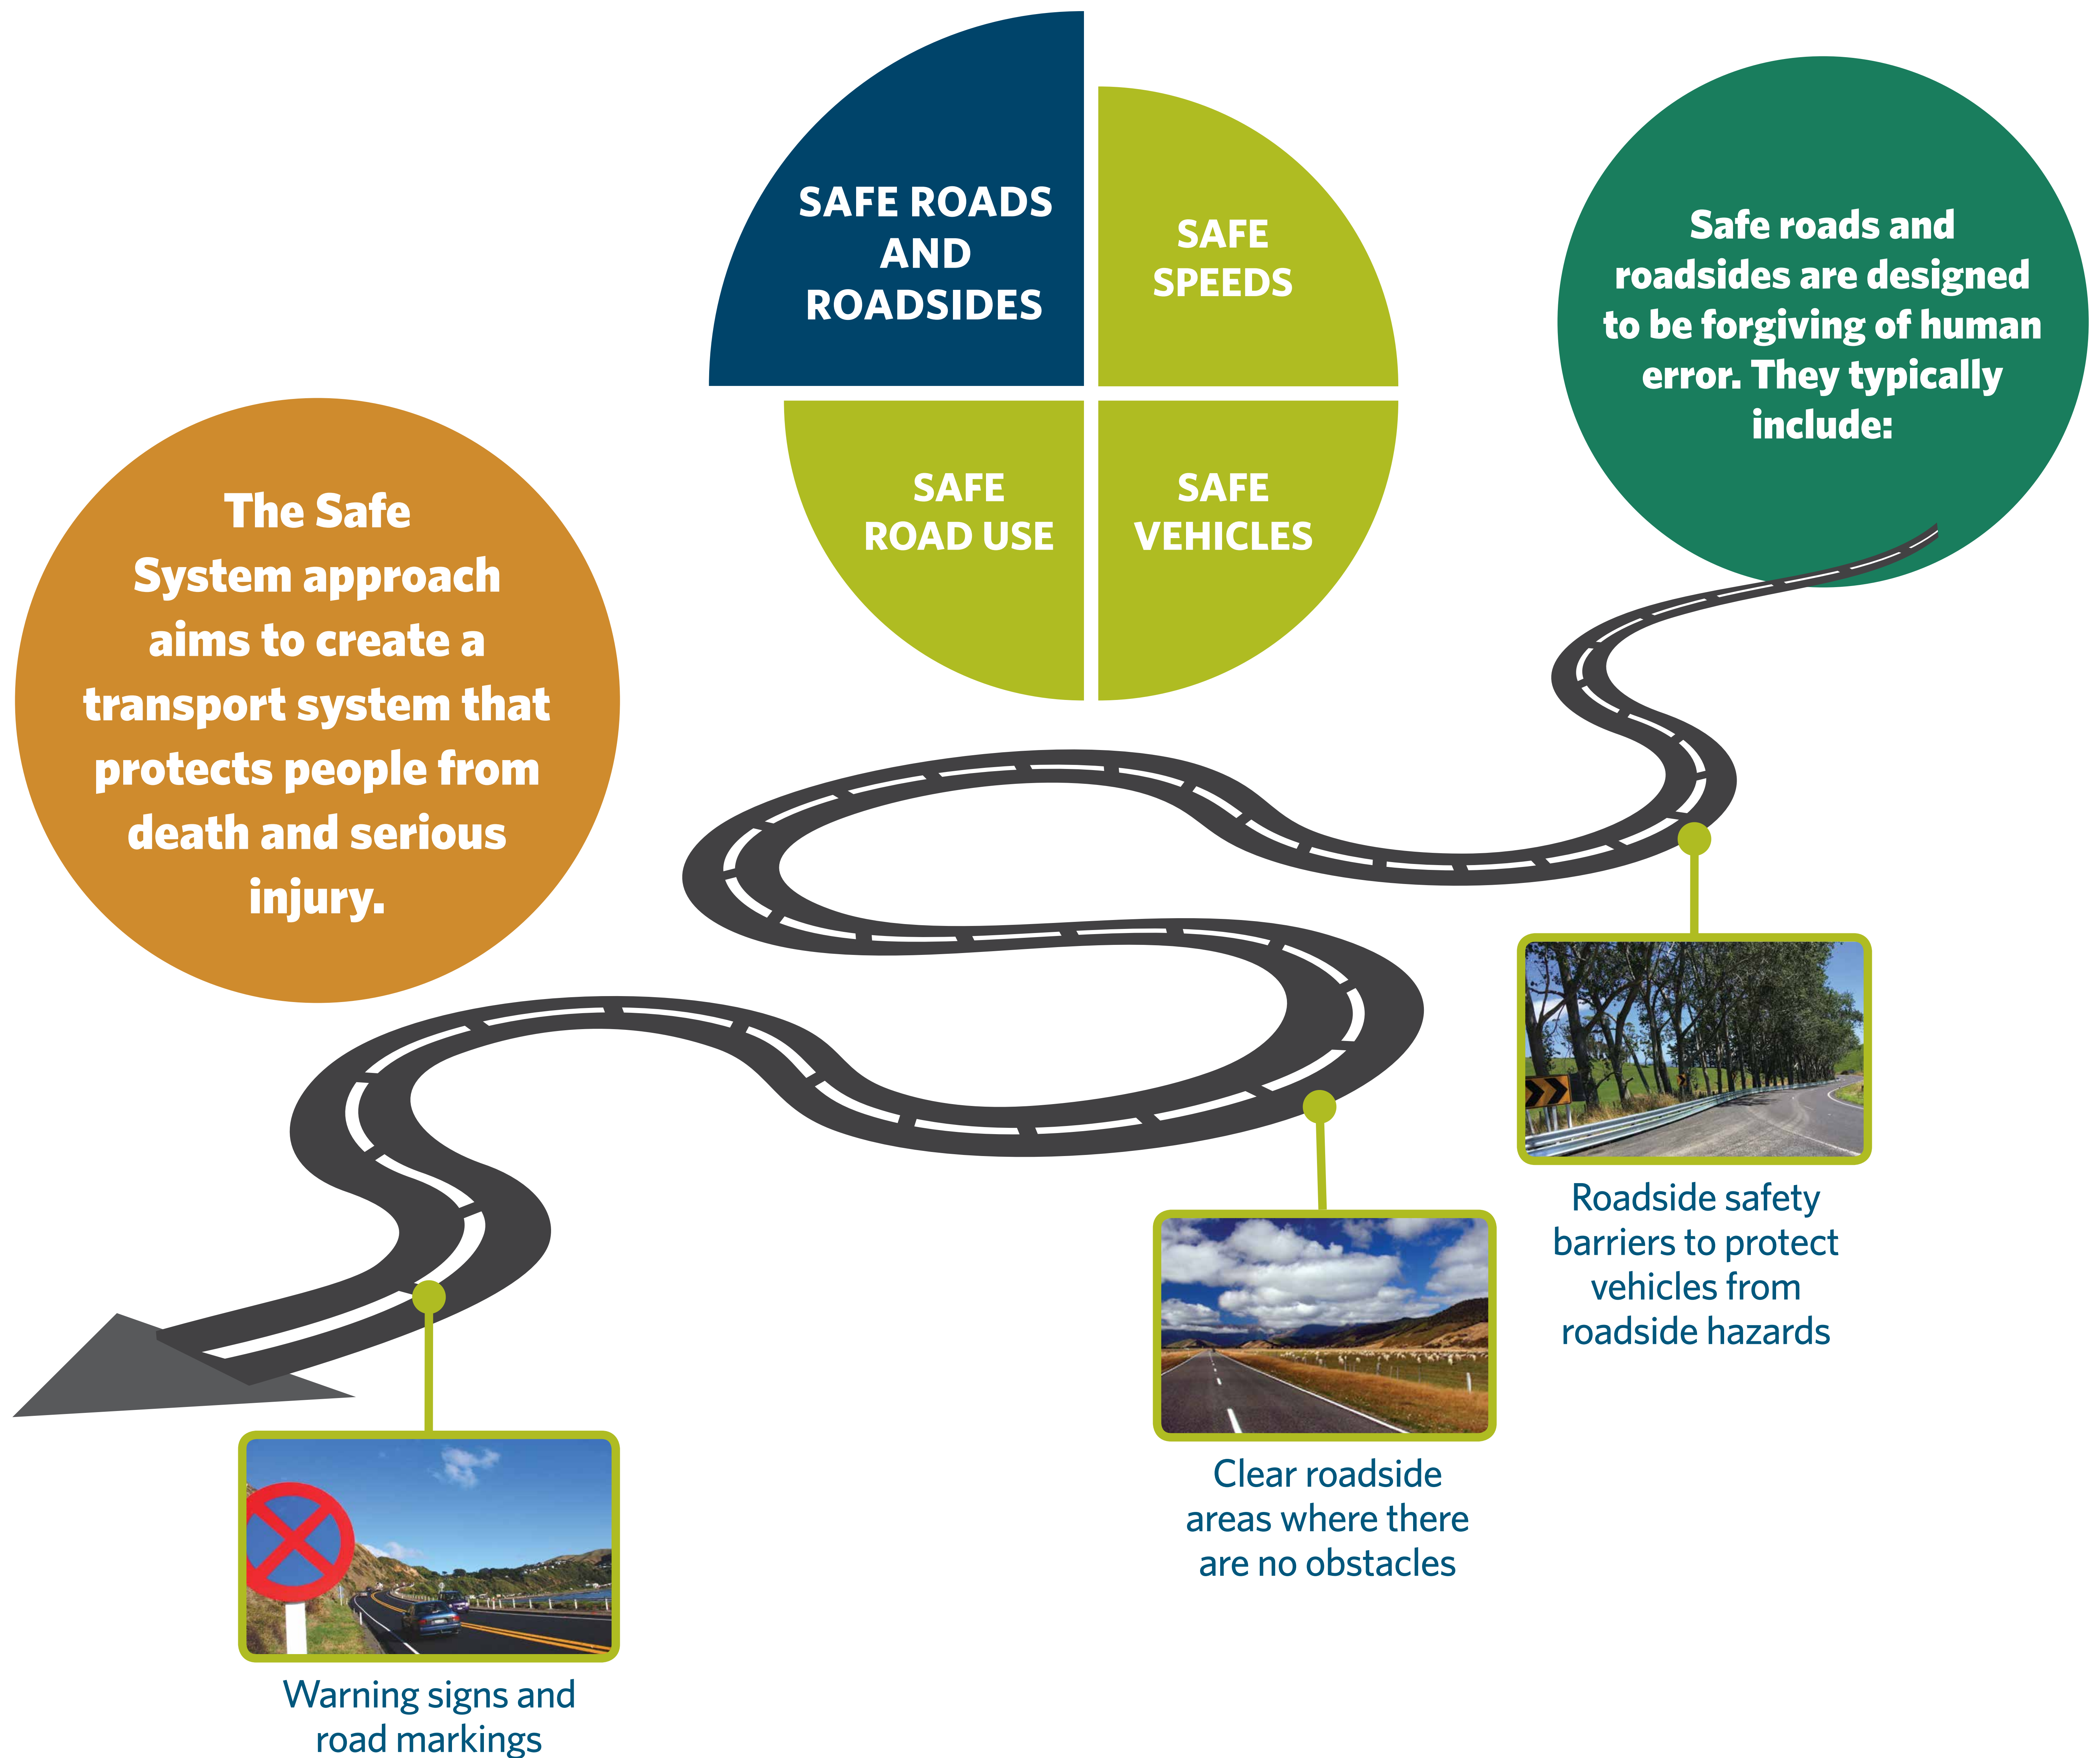

Hamilton to Raglan - Safety Improvements

MAKING RURAL ROADS SAFER

Every year hundreds of people lose their lives on our roads, and thousands more are seriously injured. A high number of these crashes happen on rural roads.

The Safe Roads and Roadsides Programme will see improvements made to rural state highways across the country using a Safe System approach.

the **4** Safe System principles

The Safe System approach acknowledges that:

- 1 People make mistakes
- 2 People are vulnerable
- 3 We need to share responsibility
- 4 We need to strengthen all parts of the system
